

Outdoor TV

Watching TV Will Never Be The Same

Runco's WP-42HD is a revolutionary 42-inch high-definition widescreen flat-panel monitor that utilizes advanced LCD technology to withstand the Midwest's outdoor climatic elements. . Featuring HD resolution and light-rejection glass, the WP-42HD's images are Runco-caliber and always impressive.

The Runco WP-42HD climate enduring enclosure has been engineered for maximum durability. Runco has gone to great lengths to ensure protection from adverse environmental conditions including temperature, exposure to moisture, dust, oils, and intermittent direct water spray. Included within the monitor is an internal setting that will allow operation in colder temperatures (-4°F in Winter Mode) so your client can enjoy viewing their TV year round. The aluminum cabinet is sealed to ensure protection from the elements and features a specially-designed internal ventilation system to provide adequate cooling. As a result, the Runco WP-42HD surpasses IP56 weather proof standards, which will allow your client to leave it outside year round, without any concerns.

Installation options are limited only by the imagination. patios, barbeques, gazebos, balconies, pools, hot tubs, gardens, tennis courts, putting greens – literally anywhere your client wants to enjoy amazing video in a sleek flat-panel design that really delivers the performance they desire!.
